FOR IMMEDIATE RELEASE

Learn Some Raystown Fishing Hot Spots

RAYSTOWN LAKE, Pa. HESSTON, Pa. – Do you want to learn where the fishing “hot spots” are at Raystown Lake while also helping the aquatic habitat of the lake? If so, a fish structure building day is the perfect event for YOU!

The U.S. Army Corps of Engineers is seeking energized volunteers to help with the construction and placement of porcupine brush cribs at Raystown Lake. Two fish structure building days will be held this year. Please join us on Saturday April 10th and Sunday April 18th from 8 a.m. to noon at Raystown Lake’s Tatman Run Boat Launch. You can help make a difference!

This is the 20th year volunteers have helped the Corps of Engineers and the Pennsylvania Fish and Boat Commission build and place artificial aquatic habitat structures in Raystown Lake. Parking and everything you need, including light refreshments, will be provided by the Corps of Engineers and the Friends of Raystown Lake.

Fish structure building days are a great opportunity for sportsmen’s organizations, civic clubs or individual volunteers to demonstrate their commitment to the fisheries of Raystown Lake. For additional information about the program or directions, volunteers should contact Park Ranger Allen Gwinn at 814-658-6810.
